SQ001 tickets

	Ticket	Developer	Completion Criteria	Demo
1	 ISR-13365 - Auto-update Searches with latest changes from included Areas (Prereqs) DONE	Pablo Vargas	When a Search Area is updated, all Saved Searches that use the Search Area are automatically updated.	
2	 ISR-14484 - Auto-update Searches with latest changes from included Areas (Plugin Implementation) DONE	Joseph North		
3	 ISR-14485 - Auto-update Searches with latest changes from included Areas (Apply to existing metacards) DONE	Pablo Vargas		
4	 ISR-15096 - Update the existing executions page to include for the new "Unread" functionality (Scheduled searches) DONE	Joseph North	There will be a visual indication for executions that have not been viewed. Once viewed the indication will disappear.	
5	 ISR-15094 - Unread execution service endpoint (Scheduled searches) DONE	Glen Hein		
6	 ISR-13266 - Basic Search - Types - Improve Options DONE	Keith Wire	Basic Search - Types - options to return results based off file extension of product. These must include all various of the selected attribute, e.g. Powerpoint returns .pptx, .ppt, .pptm.	
7	 ISR-14765 - Specify search details when saving an adhoc search DONE	Keith Wire	When user saves an adhoc search they are presented with the "create search" modal that requires them to specify title and classification.	
8	 ISR-10684 - Draw to auto open 2D map DONE	Keith Wire	The 2d Map opens automatically, if not already open, when a user clicks Draw from the Location Search. Note -If the 3D Map is open, the 2D Map does not open.	
9	 ISR-14222 - Landing Page - Add Sources Dropdown DONE	Andrew Feilder	Landing page (ie Home) includes the same Source dropdown selection as on search panes. It is to the right of the existing Date and Location menus.	
10	 ISR-14763 - 2D Map - Remove the need go through the 'Edit' button in order to modify a geometry DONE	Alexa Bird	For 2D Map Remove the need go through the 'Edit' button in order to modify a geometry. 1) Double click on geo to go into edit mode 2) Hit ENTER (or other suitable convention) to "Apply" changes 3) Hit ESC (or other suitable convention) to "Cancel" changes	
11	 ISR-14488 - Filters - Views and Sort Persistence DONE	Alexa Bird	Browser list view preferences to be improved with the following to be made sticky: - Item Sort (e.g. Created) - Filter tick box selection - Items per page selection (with increased number range) This will all apply within a browser session.	
12	 ISR-14782 - Overwrite - Rework and Add to Context Menu DONE	Alexa Bird	'New Version from Disk' available from item context menu - replaces 'Overwrite' currently in item tabs. Functionality otherwise remains the same. 'New Version from Disk' only visible to users who have permission to overwrite the item. Dialogue warns user of impact as per current Overwrite message.	

	Ticket	Developer	Completion Criteria	Demo	
13	 ISR-14730 - Shared Notes - Consolidating Display DONE	Alexa Bird	Shared Notes will only display Spaces that actually have Notes visible to that user. In creating a new note, a user will be able to select the appropriate Space(s) from a dropdown box.
